# Install

Log in into the backoffice and go to modules, then install the plugin like any other one from prestashop:

The screenshot shows the PrestaShop backoffice interface. The top navigation bar includes a search bar, a 'Quick Access' dropdown, and a 'View my shop' link. The left sidebar contains a menu with categories like DASHBOARD, CATALOG, ORDERS, CUSTOMERS, PRICE RULES, and MODULES. The 'MODULES' category is selected, and the 'List of modules' page is displayed. The page features a 'List of modules' section with a search bar, a 'Sort by' dropdown (set to 'Installed & Not Installed'), and a 'Filter by' dropdown (set to 'Enabled & Disabled'). The 'All' filter is selected, showing 145 modules. The 'Add a new module' button is circled in red. The main content area lists several modules, including '1-Click Upgrade - AutoUpgrade v1.3.12 - by Prestashop', 'Abandoned Cart Reminder Pro v1.2.2 - by PrestaShop - Popular', 'Advanced sales, tax, profit and profit margin reports v2.6.3 - by Business Tech - Popular', and 'Advanced Search 4 v4.10.3 - by Presta-Module - Popular'.

Module Name	Version	Author	Price
1-Click Upgrade - AutoUpgrade	v1.3.12	by Prestashop	Free
Abandoned Cart Reminder Pro	v1.2.2	by PrestaShop - Popular	\$114.99
Advanced sales, tax, profit and profit margin reports	v2.6.3	by Business Tech - Popular	\$179.99
Advanced Search 4	v4.10.3	by Presta-Module - Popular	\$279.99

# Configuration

## General configuration

### Datepicker with hours

[Go back to Presta's BackOffice](#)

## Datepicker with hours by ecommmy.com

Configuration

[Available Week Days](#)

[Restricted Days](#)

[Support](#)

### Show calendar inline?

☐ Yes ☒ No

Shows the calendar inline rather than using an input field

### Cut off Hour

12

Hour from which the very next available day is not enabled anymore. Input a number between 0 and 23

### First Delivery Day

1

First Available Delivery Day - e.g. 1 means one day after purchasing date

### Hours to prepare order

5

When delivering in the same day you may want some hour intervals not to show for selection.

### Days ahead

100

How many days ahead to show in calendar?

Save

Available week days

Here you can mark a day like Sunday of disabled, or edit available hour intervals by just clicking them.

Add shipping details to email

In the order\_conf and new\_order emails just add {ey\_date} and {ey\_hour} to the place you want the delivery dates displayed.

```
145         </tbody>
146     </table>
147 </td>
148 </tr>
149 <tr>
150 <td class="box" colspan="3" style="background-color:#fbfbfb;border:1px solid #d6d4d4!important;padding:10px!important">
151 <p style="margin:3px 0 7px;text-transform:uppercase;font-weight:500;font-size:18px;border-bottom:1px solid #d6d4d4!im
152 Shipping </p>
153 <span style="color:#777">
154 <span style="color:#333"><strong>Delivery info:</strong></span> {ey_date} {ey_hour}<br /><br />
155 <span style="color:#333"><strong>Carrier:</strong></span> {carrier}<br /><br />
156 <span style="color:#333"><strong>Payment:</strong></span> {payment}
157 </span>
158 </td>
159 </tr>
160 <tr>
161 <td class="space_footer" style="padding:0!important;border:none">&nbsp;</td>
162 </tr>
163 <tr>
164 <td style="border:none;padding:7px 0">
165 <table class="table" style="width:100%;background-color:#fff">
166 </table>
```

## Add shipping details to PDF invoice

The hooks are already implemented you just need to modify the pdf template (/pdf/invoice.tpl) which I choose not to overwrite not to break eventual custom changes you already may have made.

Inside the plugin I attached a folder called to\_copy that contain an example PDF template. It contains a couple of additional lines as shown below:

```
68 <div style="line-height: 1pt">&nbsp;</div>
69
70 <!-- PRODUCTS TAB -->
71 <table style="width: 100%">
72 <tr>
73 <td style="width: 17%; padding-right: 7px; text-align: right; vertical-align: top; font-size: 7pt;">
74 <!-- CUSTOMER INFORMATION -->
75 <b>{l s='Order Number:' pdf='true'}</b><br />
76 {<order->getUniqReference()}<br />
77 <br />
78 <b>{l s='Order Date:' pdf='true'}</b><br />
79 {dateFormat date=<order->date_add full=0}<br />
80
81 {if isset(<shipping_date>)}
82 <br />
83 <b>{l s='Delivery Date:' pdf='true'}</b><br />
84 {dateFormat date=<shipping_date full=0> {<shipping_hour>}<br />
85 {/if}
86
87 <br />
88 <b>{l s='Payment Method:' pdf='true'}</b><br />
89 <table style="width: 100%;">
90 {foreach from=<order_invoice->getOrderPaymentCollection() item=payment}
91 <tr>
92 <td style="width: 50%">{<payment->payment_method}</td>
93 <td style="width: 50%">{displayPrice price=<payment->amount currency=<order->id_currency}</td>
94 </tr>
95 {foreachelse}
96 <tr>
```

# Back office functionality

## Where to look for the datepicker data

The shipping date/hour is displayed inside backoffice interface on the order list and details page
